Also, please describe or provide a link to program admissions policies that allow students to enter with credit for prior graduate work, and the expected implications for time to completion. Please indicate NA if not applicable:

Students with prior graduate work are not at a disadvantage in our admissions process. Although we make no guarantees that prior coursework will be counted toward progress in our program, our process is for admitted students to submit syllabi to instructors of the corresponding course in our degree program. The instructor evaluated whether the content covered in courses is similar enough to warrant a waiver of that course. Instructors reserve the right to decline requests for course waivers, as well as the right to request additional information about prior coursework or to require demonstrations of competence in the course area (e.g. passing exams from the program's course). If prior coursework is accepted as equivalent, the requirement to complete the program's corresponding course is waived. The implication for students is that other courses can be taken in the place of waived courses, shortening the time to completion. In the past, students who have received course waivers typically have graduated in 5 years, and in rare cases, in 4 years.
